## PROFILE

A versatile and skilled Full-Stack Developer with expertise in both front-end and back-end web development. Proficient in a variety of programming languages, frameworks, and tools necessary to build and maintain dynamic web applications.

## PROJECTS

### Mini - Project

Clone Zomato web application

- Developed a mini-project in web development using HTML, CSS, and PHP, building a "Clone Zomato" web application with database connectivity. Successfully implemented static content and ensured seamless functionality.

### Mini - Project

Book recommendation system

- Designed and implemented a Python-based GUI "Book Recommendation System" as a mini-project, demonstrating proficiency in Python programming and graphical user interface development. Successfully integrated data processing algorithms to deliver personalized book recommendations based on user preferences.

### Main - Project

A System to filter unwanted message from OSNs user wall

- Spearheaded the development of a final project focused on "A System to Filter Unwanted Messages from OSNs User Walls" using Java, showcasing expertise in data analysis, machine learning, and algorithm development.

## INTERNSHIP EXPERIENCE

At BritWise company

- During my internship, I'm gaining hands-on experience by working on real-time live projects.
- Making real time Web-site.
